23 AUG 1979

MEMORANDUM FOR: Deputy Director for Administration

FROM: Robert W. Gambino
Director of Security

SUBJECT: Office of Security Significant Activities
Week of 16 - 22 August 1979 (U)

REFERENCE: DDA Administrative Instruction No. 74-5

1. This memorandum is for information only. (U)

2. The activities of the Office of Security during the week of 16 - 22 August 1979 were highlighted by the following items:

25X1A a. On 21 August 1979, representatives of the [REDACTED] rendered assistance in monitoring the destruction of a shipment of sensitive classified materials [REDACTED] (C)

25X1A

25X1A b. A representative of the Safety Branch, during a recent safety inspection of the [REDACTED] Receiver Site, detected an electrical fault condition affecting the communications facility. This problem, which could have resulted in clear text traffic being compromised, was traced to a defective neutral filter. Corrective repairs were made immediately. (C)

25X1A

25X1C [REDACTED]

3. Projected Office of Security activities of possible interest at the Directorate level include:

22 Aug 1979

Vicki from PTOS called in following for weekly log:

On 17 August representatives from OSO, OC/OPS, COMSEC
STATINTL and DDO, [REDACTED] met with OSSB representatives to establish
minimum security standards for a new base [REDACTED] STATINTL
OSSB will provide a formal statement of these standards
following C/OSSB discussions with SY/FOD.

STATINTL Call from [REDACTED] on green 32132:

During a recent safety inspection of the OC receiver
STATINTL site [REDACTED] it was determined that an electrical
fault condition existed on the electrical system within
the Red Room processing area. The fault condition indicated
ground impedance of 50 ohms, the presence of steady voltage,
or excessively large spikes of 10 ohms or greater on the
grounded electrical system. The fault condition was determined
to be the result of a defective neutral filter on the ground
which could have resulted in transmissions being copied
off of the ground system. The defect was corrected immediately. ()

(Note: He returned to work last Thurs.; he doesn't have date
of inspection.

AUG 18 1979

MEMORANDUM FOR: Deputy Director of Security (P&M)

VIA: Chief, Policy and Plans Group

25X1A FROM: [REDACTED]
Information Systems Security Group

SUBJECT: Contribution to the DDA Weekly Log (U)

9 Aug 79
25X1A Members of the Office of Security met with the
25X1A Corporate Director of Security for [REDACTED] 25X1A
[REDACTED] to discuss the current status and
future progress of [REDACTED] proposed secure data base
management system. The talk centered around two
technical issues. The first issue involved "linking"
an unclassified computer system to another computer
system containing SCI data, and the methodology to be
implemented to guarantee a "secure" one-way communication
link. The second topic covered the conceptual software
separation techniques for the compartmented data base
to permit the secure storage and processing of CIA and
other U. S. Government agencies' data. The Office of
Data Processing and the Office of Research and Development
provided technical advise and guidance for this endeavor. (U)
